## Deep Web Research For Medical Professionals

### Accelerated Medical Research

[Mednar](#) is a deep web medical search portal that accelerates your research by using state-of-the-art technology to return the most relevant results from deep web sources and Internet websites in one easily navigable page. Each search is done in real-time, querying the sources you select as if you were entering the search term on individual websites and proprietary sources, like JAMA. Duplicate results are removed, weighed for relevance and ranked according to how closely they match your search word or phrase. Clicking on any of the results will take you straight to the source website where you can view the information directly.

The screenshot shows the Mednar search interface. The search term is "cystic fibrosis". The results page shows a list of sources with checkboxes for selection. A callout box highlights the "All Sources" section, which includes:

- Commercial Databases
- Medical Societies
- NIH Resources
- Other Government Resources
- Patents

The callout box also shows a list of specific sources that are selected:

- National Library of Medicine
- NCCAM (National Center for Comp
- NIH MedlinePlus
- Office of Dietary Supplements
- PubMed
- PubMed Central

### Notable Features

**Credible research sources** – Sources like PubMed, MD Consult and ClinicalTrials.gov are carefully chosen for their significant contributions to medical research.

**Intuitive navigation tools** - Topical clustering and sort options give you the best in navigation tools while keeping the interface intuitive and easy-to-use.

**Individual source selection** – Tailor your results list by selecting only the sources you want to search.

**Advanced search features** – Specify a title, author or year to get still more targeted results.

**Downloadable results** - Email or download your selected results to a citation reader such as RefWorks or EndNote for easy reference offline.

**Five star ranking system** - The state-of-the-art ranking system finds the best results for a search, regardless of the native source's ability to rank results.

**Automatic alerts** - Repeat searches are automatically sent to an email or RSS reader, making it easy to stay up-to-date on important articles and content.

**Flexible Filters** – Sort and filter results lists by author, date, title, relevance or source to refine your search for the perfect result.

**Smart Clusters** – Drill down into customizable clusters such as publishers, authors, topics, dates and more. Each cluster provides up to three levels to hone results to find the needle in the haystack.

“Anything that saves all of us time as we hunt for relevant data amidst overwhelming amounts of information on every conceivable aspect of disease day after day catches my attention and it has been caught today by Mednar.” - *Hope Leman, Contributing Author, AltSearchEngines.com*
